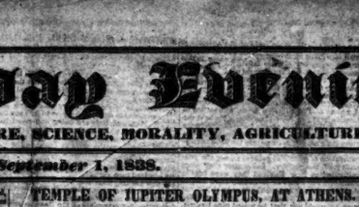
Vol. XVII. Philadelphia, September 1, 1838. Whole No. 892

TEMPLE OF IUPITER OLYMPUS, AT ATHENS.



The Temple of Jupiter Olympus was one of the most magnificent specimens of Greek Architecture, in the days when the Land of Greece was the full tide of prosperity, and ever since lying in ruins, its beauty and dimensions are objects of admiration. Before proceeding to a description of the former grandeur of this majestic structure, a brief recital of the subject it commemorates may have some interest.

JUPITER, in Greek, *Zeus*; son of Saturn and Rhea. The Greek account of his birth, says Bonnet, he is sometimes called *Kronion* and *Saturnius*. He is the brother of Vesta, Ceres, Juno, Neptune and Pluto. In the different periods of Grecian history, very different notions were entertained respecting this god. The Greeks considered him, from that remote time as the symbol of nature. His oracle was at Dodona, and hence he is called the *Dodonian Father*, &c. In the Orphic hymns, *Jupiter* is a mystical symbol, and denoted the upper air; he is called the first and the last, and the beginning and end of all things. In Homer, Jupiter was an sister and wife, Juno, Neptune and Apollo wish to hurl Jupiter from his throne, but by their cowardice and treachery they are prevented. It was from time to time enlarged, and improved in appearance, until it was finished by Adrian. The Temple is of the Doric order, and was built of Parian stone; from its situation on a high rock it was a conspicuous object from all the lower elevations which surround the city, the situation was 60 feet; the breadth 35 feet, and the length 135 feet. The outside was adorned by nearly 150 fluted columns, 60 feet high, and 8 feet in diameter. The roof was of marble, and was a league in circumference. The roof of the building, composed of marble from Pentelicus, was cut in the shape of tiles. At the extremity of the roof facing a large lake, there was a spout, and in the middle was a golden image of the sector of the heavens, and below this a shield of gold of the head of the Gorgon Medusa was sculptured. The following description on the shield elucidates the subject of the sculpture.

The Athenians, Argives, and Ionian tam'd Tartagia's sons the golden bowl have pitch'd
The second gift, of all that Greece can boast
To vanity with their temple, the Spartans gained.

The Cleans after having conquered the Pisæans, determined to dedicate the spoils to the erection of a statue of Jupiter, in the Temple of Olympus.

The Olympian Jupiter executed by Phidias, represented him sitting on a throne, which was made with an olive wreath of gold about his temples. Victory, in her left hand, and in her right bearing the remainder of it, hanging down in rich folds to his foot, which rested on a foot stool. The robe of Jupiter was of gold, and every, the dress of beaten gold with an imitation of all sorts of animals. The embroidery on the right hand stood the goddess of victory, terrice, and behind the statue, the figure of a boy, with one eye of ivory and gold. She holds a wand, which is apparently studious to entertain a young his service. In the left hand the divinity held a sceptre, composed of various metals in curious workmanship, on the top of which an eagle was surrounded with magnificent drapery which was drawn up on every particular part of work, when the deity was to be exhibited. The right foot left behind the left, and the latter, a various animals and flowers, especially the lily were represented.

The throne is made of ivory and gold, variegated with precious stones and ivory, adorned with pictures of animals and statues. There are four images of victory, each of which is represented dancing at the foot of the throne. There are also two other similar figures at the extremities of the feet of the statue, while before it were two others, which were drawn by the Centaurs, and under them Apollo and Diana are represented as standing on pedestals. Under one another—nothing of late I see.

Within the walls was wrought the grave-digger with a pick axe and spade upon his shoulder. He had dug the ground. He appeared within a few yards of where we sat. He measured off a certain length, and then encircled the little piece which the soldier had chosen to mark out the burial place of his family. Convulsion rent the earth beneath the monument, he shivered—he grasped my arm—his lips quivered—he trembled to his feet, and pointed with his sword trickled from his temples. He spoke, but his voice had ceased—he had lost the use.

"Man!" he exclaimed in agony, "whose grave is that?"

"Hush! hush my pa," said the grave-digger, casting back at his master; "whasoo a way is the end of the world, and the beginning of Answer me," cried the soldier, seizing his hand, "I command you whose grave is that?"

"Mercy me!" replied the man of death, "you are surely out of your head—it's an odd body that you be, to be sure, to ask me such a question as the answer for sparrow?"

My father got the top of the Temple the river Cladeus is represented, and on the left of Jupiter, standing by his throne, Victory, by which is the character of Pelops, the horses, two men, and the grooms. In this part the hip of the building was a rock, and contained a representation of the river Alpheus. Within the summit the Lapithæ and Centaurs, the ambitionists into battle. A noble part Theseus is revenging himself on the Centaurs with a club raised over one of them, one of which carries away a virgin, and the other a part of the table. The twelve labors of Hercules are also represented above the columns of the Temple, beginning at the eastern corner of Dionede, where he is seen assisting Atlas to support the heavens, and ending with the labor of Cerberus. Above the back part of the door he is also seen taking away the girdle of Amazon. The first story of the Temple represents the Centaur Nessus, the Nymphæan birds, and the Stymphalian birds.

In the other rules were shown a band of warriors fighting with the Thracians and the Amazons. The number of the former on each side is twenty each. The former lots in a row on the left hand, but there is a considerable disparity in the two. In order to prevent the Amazons from flying, they are represented as mounting walls were reared at these, that part of the Amazons. They seemed to be in the act of utter parts contended pictures.

The figure of Jupiter and the throne above the statue of Phidias is made on one side three graces, and on the other as many hours. Around the throne, on the lower part, were placed the Muses, in the form of a circle. In the front of the throne, and the other, and

SILK INTELLIGENCE.

MORUS MULTICAULIS.

We will give a few of the numerous reasons we have for believing that the Morus Multicaulis is the White Mulberry.

1st. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

2d. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

3d. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

4th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

5th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

6th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

7th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

8th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

9th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

10th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

11th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

12th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

13th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

14th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

15th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

16th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

17th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

18th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

19th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

20th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

21st. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

22d. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

23d. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

24th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

25th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

26th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

27th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

28th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

29th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

30th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

31st. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

32d. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

33d. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

34th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

35th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

36th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

37th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

38th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

39th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

40th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

41st. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

42d. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

43d. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

44th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

45th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

46th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

47th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

48th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

49th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

50th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

51st. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

52d. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

53d. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

54th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

55th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

56th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

57th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

58th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

59th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

60th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

61st. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

62d. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

65th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

66th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

67th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

68th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

69th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

70th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

71st. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

72d. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

73d. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

74th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

75th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

76th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

77th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

78th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

79th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

80th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

81st. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

82d. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

83d. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

84th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

85th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

86th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

87th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

88th. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry. It is known that the Morus Multicaulis was introduced into this country from France, and that it was there known by the name of the White Mulberry.

SUB-MARINE VOLCANO NEAR THE EQUATOR.—ATLANTIC OCEAN.

The attention of the Academy of Sciences at Paris has been lately occupied by the subject of sub-marine volcanoes in the Atlantic Ocean. We find in the *Paris Monitor* a report by M. Daussy, read on the 8th March, announcing the appearance of a new volcanic island between those made from time to time by different vessels, and which has since disappeared. It was first perceived by them about twenty miles south of the equator, on the meridian of 19° 30' west of Paris, and was then of the dimensions of a sub-marine volcano. M. Daussy attributes the appearance of this island to the action of the Western Islands, and the more recent one of the volcanic islands of the Madal Archipelago, in the neighborhood of the conclusion; and makes some remarks respecting the probable existence of a submarine range from the Azores, in which we particularly concur. The authority for crossing these regions, and the position of the islands, is of the highest importance, and the subject is of the first and frequent occurrence, such as that commenced in our chart of the "Rapid Shoal." A danger which may be considered as one of these shoals. At the same time that we rejoice to see this interesting and important a subject in such able hands as those of M. Daussy, we are impressed from the necessity of continuing to inquire, by addressing our readers to our volume for 1835, (No. 6, first series,) to which they will find a particular notice of the instances adduced by him, in a communication from our valuable correspondent, Mr. Purdy, whose attention was directed to this subject by the extraordinary appearance of the sea in the Pacific, in 1833, and which we believe to be the same as that described by Mr. Daussy. We are also indebted to Mr. Purdy for the following account of the appearance of the sea in the Pacific, in 1833, and which we believe to be the same as that described by Mr. Daussy.

"On the 15th of March, 1833, in the Pacific Ocean, in lat. 1° 30' S., long. 110° W., the ship Rapid, Captain Worth, was surrounded by a shoal of fish, which appeared to be about the size of mackerel, and of a dark color. They were in such numbers that the sea was literally covered with them, and they appeared to be in a state of great confusion. The water where they were was of a deep blue color, and the fish

PHILADELPHIA WEEKLY PRESS.

SATURDAY MORNING POST.

PHILADELPHIA.

Saturday, September 1, 1838.

The Proprietor of the paper wishing to be a guest of his host in other journals, will not be a slave or tolerant to the establishment of a Sabbath-breaking monopoly, and will not be willing to contribute to the management of its business. To a person who may bring a reference, he or we will be much obliged.

CAUTION.

The public are cautioned against paying any subscription to EDWIN S. WAYFIELD, who resigns as a travelling agent for several months in this section of the country.

The district of Southwark, so far as we have heard, will yet give a handsome majority for the redemption of its certificates.

THE MERCHANT'S DAUGHTER.

Mrs. Carey, Lea & Blanchard have published an interesting and lively novel in two volumes, with the title of "Merchant's Daughter," as written by the author of 'The Heiress,' 'Ellen Percy.' Some of the English reviews have favorably of the work, and the publishers have no doubt that the public will be pleased with it. We have formed an opinion that it was well adapted to sell—to the amusement, and moral improvement of those who are pleased with fiction when it is well written.

We have been requested to say that we were in error last week in stating that the vote of Cumberland was the last; that the noted Smith 17 resolution was "unanimously" agreed to. It appears it was carried by a vote of 25 to 17.

MORE DUELLING.

It is needless to deny that the moral character and habits of a large portion of our country is in a most unenviable and demoralised state. Every newspaper teems with assassination, assault with pistols, bowie knives, and other murderous weapons: and homicide is committed in every quarter of our vaunted civilised community. We abstain from publishing many of these bloody testimonials of unbridled passion and inhumanity, from a feeling that our readers are tired of them. Very frequently cowardice and brutality are prominent characteristics of these affrays. In our last paper we noticed the cowardly attack of T. P. Moore, (sometimes called Free Tom Moore,) on Mr. Preston, editor of the Louisville Journal, in the presence of his wife and children, in consequence of the publication of such of their statements. Mr. Moore's code of morals in his "justification" appears curious, especially as he is accused of having been a leader in the celebrated Dorr rebellion, and a bosom friend of Gen. Thos. W. Dorr, the gallant veteran, Gen. Harrison, ex Minister to Colombia, by all of his friends, is said to be giving ball for their appearance at the criminal court.

For a series of years, during a greater part of which I resided in Philadelphia, I was a witness to the fact, that two millions of dollars were annually brought, by the basest calumnies and vilest efforts of the human mind, into the vaults of the Bank of the United States. The amount of silk annually imported into the United States is enormous, and the duties thereon imposed on our citizens by the tariff of 1832, are giving ball for their appearance at the criminal court.

Canada papers say that emigration from Britain to the western states is increasing. Striking descriptions given of town and lands in the west, have induced many to leave the country whence they will always be more appreciated, for a land where peace and plenty reign.

Several of the boys whose ages were between 13 and 17 years, were last week arrested for robbing the house examined before Mr. Conrad, of the Northern Liberties, it appeared that one of the boys, who was committed to the Old York Road near Tannenary street, of those who were committed for trial; and the others were discharged.

The Wheeling Gazette, says that "there are fifty or sixty miles of the Ohio river in this state, at the present time, without a raft, while at this time days established a line of hydrophobia.

THE LOOKET'S LAMENT.

By Lucy Lake, Jr.

We saw, I look on some I see,
And one I read in me;
I looked to see if you looked me
Was looking back at me.

You looked to see if I was looking
At you looking at me;
We looked, we looked, we looked,
We looking looked at me.

We looked to see if you looked
At me looking at you;
We looked, we looked, we looked,
We looking looked at you.

I looked to see if you were looking
At me looking at you;
I looked to see if you looked
At me looking at you.

We looked to see if we looked
At you looking at me;
We looked, we looked, we looked,
We looking looked at me.

We looked to see if you looked
At me looking at you;
We looked, we looked, we looked,
We looking looked at you.

We looked to see if we looked
At you looking at me;
We looked, we looked, we looked,
We looking looked at me.

We looked to see if you looked
At me looking at you;
We looked, we looked, we looked,
We looking looked at you.

I looked to see if you looked
At me looking at you;
I looked to see if you looked
At me looking at you.

Yes, I looked to see if you looked
At me looking at you;
Yes, I looked to see if you looked
At me looking at you.

Yes, I looked to see if you looked
At me looking at you;
Yes, I looked to see if you looked
At me looking at you.

A Happy Husband.—A gentleman who has been married for a number of years, and has been blessed with a large family, was asked by a friend how he managed to live so happily with his wife. "Why," replied he, "I always make it a point to let her have her own way in every thing."

Mississippi vs. Maine.—Many is much admired by ladies. The celebrated Mississippi steamer Magnolia was launched at Cincinnati, and christened by a lady named Maine. Of course the boat will be known by the name of Mississippi Maine.

Punctuation.—A correct man is a grammarian without learning that "God is no respecter of persons." Punctuation is the art of making sense of nonsense which appears very much like sense without it. Punctuation is a science that consists in knowing where to put a period, when to use a comma, and how to raise a note of interrogation. Punctuation is a thing that the good natured may turn to ridicule, and the choleric may get angry at, but which the wise will study, and the fools will neglect.

The Pilote de Calvados announces the failure of the potato crop in the neighborhood of Granville. What interest the inhabitants of Granville must have in such a subject, it is impossible to say, but the failure of the potato crop is announced as a matter of great importance.

Care of an American Mother.—A lady took a child to a physician in Utica, to consult him about its health. She had scarcely got through the inquiries if he did not think the springs would be beneficial, when the doctor exclaimed, "Why, madam, you are the very woman I have been looking for the last two years. Did you ever try the springs—and the answer you apply for regularly the better." Yes really think it would be good for the dear thing." "Then, madam, I tell you what it is the best thing I have ever—" What spring water?" interrupted the mother? "Any will do madam, where you can get plenty of soap."

A Paddy rent a hunting and shouted to get along side of a frog pond, and seeing a squirrel shot down up and says he, "Now my wrate darling, I'll give you a ducat!" "Arrah, by what?" says a half frog from the pond hearing and, "you be d—d, Mister, the divil a one of you squirrel I've seriously, and at the same time observing down his pistol rolling up his sleeves —" that's more than I'd take from any man in all Ireland, sir! I'll take it of no man, not even —now, by St. Patrick, if you're a man come forward, an' we'll see what's the fair."

Warning.—Several young men were travelling, some years since, on the mountains of Vermont. They had walked a great way, were very thirsty and, finally, under the shade of a much beat and sweat, approached a neat house, on the side of a road. Milk was offered them by the fair lady, which they swallowed with a certain something akin to zest with which Mr. Webster's "Bay State" and Mr. Pickwick's "Old Weller," put a way "outside."

Every bowl being before long, another was accepted and the cry was still for more. The hostess finally brought out an enormous bowl of milk, and set down on the table and said "One would think, gentlemen, you had never been watered."

Pre-Money.—Our worn, in early times, acceptable to our people in the Indian trade, was of the wampum character which they used until the days of Penn, when they were superseded by coin. Since and a combination of money, and hence is derived the familiar expression that a man is still fattened "pre-money."

When Mr. Hankey was on engage as a banker, a sailor had, as part of his pay, a dram on him for fifty pounds. The banker thought an extreme sum, and, calling at the bowel, instead on seeing the parcel opened, found that it was at length accorded to; and when the banker and the sailor met together, the following conversation ensued between brother Mr. Hankey, I've got a trickier for you; didn't like your last present from Mr. Hankey. That was kind; pay what's due to him for me. Never mind, don't be afraid, I won't run you. No a fifty, not that sir, a thousand, indeed. Come, don't fret; give a few pounds to your self, and send us on money per week; I shall mention it to my lady.

HORSE RACING.

A writer in the Louisville City Gazette, thus sensibly presents his views on the matter:

"Horse, it is said, improves the breed of horses. And what if they do? Why else the horses at all? But I deny the truth of the position. Some few startling or striking facts are on the other side. Some horses are kicked to death on the best horses, and the best blood in the world are there. A few great racing stock of England and America come from the blood of the Godolphin Arabian, from the same source in Nedjed, and, yet the vast New England horses are worth it in the country from fifty to a hundred per cent. more than the best horses.—Really they are the strong, bony, heavy, useful, stage stock, or all, or those of racing stock. But I said in Virginia, by the stage drivers, that Virginia horses were brought from Tennessee and New-Hampshire—the Green Mountain horses are the best in the country for durability, strength, hardiness and endurance. Yet there is no racing in New England. Racing then, is surely not essential to such good horses.

A Voluntary Quarrel.—Among Incident's recent pranks was an extraordinary quarrel for which medicines. There was not a dose for sending those parties together with poison, but was not acquainted to know the name, qualities, and the individual virtues of every cough drop, lozenge or worsted specific for hoarseness or cold that ever was invented. He always carried a box with an assortment in his pocket, and if he chanced to be without it, or those which he had did not happen exactly to please him he was sure to walk into the first chemist's he came to, to purchase what he conceived his case required. The result had been many interpositions, as well as to many a host. One morning Jack Johnstone, on a favorable occasion, was
